

Catalog Number

58022-PP25-K

Syringe Filters, 25mm, Polypropylene, 0.22µm Pore Size. Turquoise Polypropylene, AQ Brand. 1000/CS.

Additional Info

Advanced Quality Polypropylene Syringe Filters, AQ™ brand, for Pharmaceutical Grade HPLC & Dissolution Testing. Manufactured with a unique 0.22µm Polypropylene membrane in a 25mm polypropylene housing with very low amount of conditioning yet very hydrophilic, These syringe filters are made for laboratories that require consistent, high performance results with ease of use especially during high volume work. Excellent choice when laboratories cannot afford poor chromatographic results.

These filters are compatible with aqueous or organic HPLC solvents, acids and bases and have been designed extractable free even in the first 2ml of filtration. The uniquely designed outflow path has 16 channels for minimum back pressure and allows for less hand pressure from the user making for greater compliance and fewer complaints.

Validated for many regulatory requirements, they are designed, tested and QC certified. They comply with US FDA CFR Title 21, Part 210.3(b)(6) for minimum Fiber Release and with USP
