

Catalog Number

68518-25P-4-3M

HPLC Column, RP C18, Wide Pore, 5um, 4.0mm ID x 250mm Length, 300A. Cogent Brand. 1 EA.
CUSTOM ORDER.

Additional Info

This Cogent RP C18™ Wide Pore Stationary Phase has been a premium value and used by HPLC laboratories for many years. It is double end capped (*fully*), with traditional bonding of an 18 carbon silane to the highest purity silica available.

With a 5 µm Particle and 300A Pore Size, this column works well with higher flow rates and lower back pressures. Used for large hydrophobic or neutral compounds in Reversed Phase, this Octadecyl Phase is also excellent for long chain fatty acids, some proteins and peptides.

This column is often chosen for starting points of new methods or for Substitution for USP L1 Methods for larger molecules.

This is a CUSTOM ORDER manufactured item which cannot be returned or canceled once an order has been placed. Click [HERE](#) for more information on what is a Custom Order.
