

Catalog Number

84518-05P

HPLC Column, RP C18 PE, 5um, 4.6mm ID x 50mm Length, 100A.
Cogent RP Brand. 1 EA.

Additional Info

This Cogent RP C18 PE™ Stationary Phase has been a premium value and used by HPLC laboratories for many years.

It is an ideal Alternate for your USP Methods that use the L1 Classification and 100% Water as the Mobile Phase for hydrophobic samples. Very rugged, and often called "Polar Embedded", it can be used in typical Reversed Phase or *HILIC* modes.

Used for hydrophobic or neutral compounds in Reversed Phase, this Octadecyl Phase is excellent for long chain fatty acids.

This column is often chosen as a scouting column for preparative methods.
