

Laboratory Syringes - Luer Lock

Made for Chromatography & Dissolution Testing

LUER LOCK FOR SAFETY • ECONOMICAL • INERT • DISPOSABLE

These syringes are excellent for use with 4mm, 13mm & 25mm MicroSolv syringe filters or other filter brands.

These all plastic syringes are made for use in the laboratory. They are latex free, contain no rubber, no silicone oil, styrene or DEHP. These syringes are the best choice for any situation needing an inert, non-reactive syringe.

Manufactured only from laboratory grade polypropylene and polyethylene, these non-sterile syringes contain a safety stop to prevent accidental spills.

Designed with centered, Luer Lock tips, these syringes are simply the best for laboratory applications such as HPLC, Dissolution Testing, CE, LCMS and many more.

WHY UPGRADE TO LUER LOCK?
Safety and security of the "lock" minimizes filters "blowing off" the syringe when back pressure gets too high.

Cat. No.	Description
58903-S-A	3ml. 50/pk.
58903-S-C	3ml. 100/pk.
58903-S-K	3ml. 1000/case
58905-S-A	5ml. 50/pk.
58905-S-C	5ml. 100/pk.
58905-S-K	5ml. 1000/case

Cat. No.	Description
58910-S-A	10ml. 50/pk.
58910-S-C	10ml. 100/pk.
58910-S-K	10ml. 1000/case
58920-S-A	20ml. 50/pk.
58920-S-C	20ml. 100/pk.
58920-S-K	20ml. 1000/case
