Notes: Ivermectin is a semi-synthetic Antiparasitic Medication derived from Avermectins, a class of highly-active broad-spectrum Antiparasitic Agents isolated from the fermentation products of *Streptomyces avermitilis*. This drug is used in the treatment of Onchocerciasis, but may also be effective against other worm infestations (such as Strongyloidiasis, Ascariasis, Trichuriasis and Enterobiasis). Applied topically, it may be used in the treatment of head lice infestation.

Notes: Calculation for Capacity Factor - Relative Retention $k = (t_R - t_0) / t_0$
