

What Makes Non-Coated Mobile Phase Reservoir Bottles Suitable for use in Various Temperature Environments - FAQ

Date: 152-MARCH-2025 Last Updatred: 8-NOVMEBER-2025

Our [non-coated Mobile Phase Reservoir Bottles](#) feature a low coefficient of thermal expansion (3.3), providing exceptional temperature resistance (range from -70° to 500°C) compared to standard lab glass (or soda lime glass).

This low coefficient of thermal expansion attribute allows for repeated use in freezers, microwaves, autoclaves, and dry heat sterilization chambers.
