

Can Snap Caps be used on Crimp Top Vials - FAQ

Date: 14-APRIL-2020 Last Updated: 27-OCTOBER-2025

No, Snap Caps are specifically designed to be used only with vials that have a snap-ring finish—commonly referred to as [Snap Ring Vials](#). These vials feature a specially designed top that allows the "snap cap" to securely attach.

While crimp caps can technically be used on snap-ring vials, they are engineered to perform best with *serum finish vials*, also known as *crimp-top vials*. These vials provide the optimal sealing surface and neck structure for crimp caps, ensuring the best performance and seal integrity.

Summary:

- **Snap Caps** → Only for **Snap Top Vials** (with snap-ring finish)
- **Crimp Caps** → Best used with **Crimp Top Vials** (serum finish)
- **⚠ Do not use Snap Caps on Crimp Top Vials**
