

## ISO Certification or Similar Accreditations and our QMS

DATE: 13-FEBRUARY-2014 Last Updated: 13-FEBRUARY-2026

### **Does MICROSOLV Have ISO or Similar Accreditation? – Current Status & Quality Program Overview**

MICROSOLV is committed to maintaining a high level of organizational quality, process control, and documentation across all operations. While the company does not yet hold formal ISO accreditation, MICROSOLV adheres to structured internal systems that mirror many ISO-aligned best practices and we are actively engaged in an ISO Certification program.

This article outlines what MICROSOLV currently has in place and its progress toward ISO certification.

---

#### **Current Accreditation Status**

As of now, MICROSOLV does not have any formal ISO certification.

However, the company does operate with rigorous internal quality systems comparable to those used in accredited environments.

---

#### **Robust Quality Assurance Program**

Even without formal ISO certification, MICROSOLV maintains:

##### **✓ Standard Operating Procedures (SOPs)**

Structured SOPs guide all operational processes, ensuring consistency and compliance across departments.

##### **✓ Comprehensive Quality Assurance (QA) Program**

MICROSOLV's QA system covers manufacturing, documentation, internal audits, and performance monitoring to ensure traceability and reproducibility.

##### **✓ Full Internal Documentation System**

All personnel follow detailed process documentation, including:

- Work instructions
- Quality requirements
- Operational procedures
- Corrective action protocols

##### **✓ In-House Analytical & Quality Control Laboratory**

MICROSOLV operates its own QC lab to support internal testing, verification, and product integrity checks.

Together, these systems ensure a high-quality operational environment even before receiving formal certification.

---

## Progress Toward ISO Certification

MICROSOLV has officially begun pursuing **ISO 9001:2015 certification**.

### Key Milestones:

- June 2024: MICROSOLV initiated the ISO certification process.
- Ongoing: MICROSOLV is working directly with NC State University to prepare for and implement all requirements for successful certification.

This partnership supports MICROSOLV in aligning all procedures, documentation, and quality systems with ISO 9001 standards.

---

## What Customers Can Expect During the Certification Process

While formal certification is pending, customers can rely on:

- A well-established quality system already in use
- Continued improvements as MICROSOLV progresses toward ISO 9001 compliance
- Transparent communication and documentation support upon request

The transition will further strengthen MICROSOLV's manufacturing, customer service, and operational excellence.

---

## Conclusion

MICROSOLV is not yet ISO-certified, but the company operates with robust SOP-driven processes, complete quality assurance infrastructure, and a fully documented internal system.

With its ISO 9001:2015 certification process formally underway and guided by NC State University, MICROSOLV is actively working toward recognized accreditation while already maintaining high internal quality standards.
