

## EPP or Easy Purchase Pack Definition - Tech Information

*Date: 30-MARCH-2012 Last Updated: 28-january-2026*

An **Easy Purchase Pack (EPP)** is a streamlined, bundled solution designed to simplify the procurement and management of autosampler vials and their matching caps. Instead of ordering these components separately, an EPP provides both under a single catalog number (SKU) , making it an efficient choice for laboratories seeking convenience, consistency, and better workflow organization.

### Why Labs Use EPPs

#### 1. Simplified Ordering & Procurement

EPPs package vials and matching caps together as one item, eliminating the need to track or order multiple SKUs. This reduces ordering errors and saves time during procurement—especially helpful for labs with high sample throughput or strict replenishment schedules.

#### 2. Improved Inventory Management

Although the components are boxed together, each part remains individually packaged, making it easy to store, distribute, and track usage. This packaging approach supports clear inventory accounting and minimizes misplaced components.

#### 3. Analyst-Friendly Distribution

EPPs can be issued directly to analysts or individual workstations, ensuring everyone has a complete, ready-to-use set of vials and caps. This improves accountability, reduces downtime, and ensures consistent cap-to-vial matching.

#### 4. Consistency & Compatibility

Because the vials and caps are paired intentionally, you avoid mismatched components, which can lead to sealing issues or inconsistent results. EPPs guarantee compatibility, helping maintain the quality and integrity of your autosampler workflows.

### Why Choose an EPP?

Whether you're running a high-volume analytical lab or simply want to streamline your ordering processes, Easy Purchase Packs offer a convenient, organized way to keep essential autosampler supplies stocked and ready. They help reduce complexity, support efficient workflow management, and ensure analysts always have the components they need—together, in the correct format, and ready for use.
