

Can the Window Maker Heating Modules be Used with Either US or European Voltage Units - FAQ

Date: 30-OCTOBER-2013 Last Updated: 8-NOVEMBER-2025

The Window Maker units are currently produced with 110/120V voltage for use in US & Canada (cat# 07200-S) and the replacement modules (cat# 07301-S, 07201-S, 07204-S, 07207-S) differ only in size of the burn window and can be used with new and older Window Makers even if you have a discontinued unit with different voltages.
