

Catalog Number

47320-01

Tubing Connector Fittings, high pressure, one piece, 1/16 inch, PEEK, Natural, short head and short length with 10-32 screw threads. Finger tighten, ARE-Applied Research brand. 1 EA.

Additional Info

These all PEEK tubing connector fittings are used to connect PEEK or Stainless Steel tubing in the high pressures zones of HPLC systems.

Fitting has a "short" (thickness is less than most fittings) 12 mm diameter knurled head, 15 mm total length (top to bottom) with an 11 mm thread length.

The short length is useful when your column has to be placed in a small space such as an oven or chiller and having a tubing connector with a short head and short total length helps with space requirements. The beveled inlet hole helps to make threading the tubing through the fitting easier.
