

# Catalog Number

47320-04

**Tubing Connector Fittings**, high pressure, one piece, 1/16 inch, PEEK, Natural, standard size head but a long length with 10-32 screw threads. Finger tighten, ARE-Applied Research brand. 10/PK.

## Additional Info

These all PEEK tubing connector fittings are used to connect PEEK or Stainless Steel tubing in the high pressures zones of HPLC systems.

Fitting has a 12 mm diameter knurled head, 25 mm total length (top to bottom) with an 16 mm thread length.

The long length is useful when your column or union or detector has a deep threaded fitting and the extra length is needed to seat the tubing properly. The beveled inlet hole helps to make threading the tubing through the fitting easier.
