

## Catalog Number

48220-04

**Mobile Phase Filter, 10 um, Stainless Steel, .375 inch OD, 1 inch long, 1/16 inch Connector. EPP-Porous Products brand. 1 EA.**

### Additional Info

These Stainless Steel filters are manufactured to provide very high filter capacity and throughput. The 10um pore size will filter most undissolved particles from your solvents before they enter your HPLC pumps, columns and instrument but will produce less resistance to the vacuum and the in-flow of solvents compared to the 2um filter.

*Install these filters directly in your mobile phase reservoir bottles. Tubing sold separately.*
