

Catalog Number

48220-07

Mobile Phase Filter, 20 μ m, Stainless Steel, 0.375 inch OD, 1 inch long, 1/16 inch connector. EPP-Porous Products brand. Bulk Price.

Additional Info

These 316L Stainless Steel filters are manufactured to provide a very high filter capacity and throughput and are passivated with a 30% nitric acid solution. The 20 μ m porosity will filter out larger undissolved particles from your solvents before they enter your HPLC pumps, columns and instrument.

These filters will produce much less resistance to the vacuum and the in-flow of solvents than the 2 μ m or the 10 μ m filters.

Included with each *Mobile Phase Solvent Filter* is one ETFE ferrule and one low pressure male nut connector for use with 1/16th inch (1.6 mm) OD tubing. Tubing sold separately.
