

Catalog Number

63087-25P-W

HPLC Column, PAC, 5um, 4.6mm ID x 250mm Length, 100A with WCS hardware. Partisil Brand. 1 EA.

Additional Info

This Partisil PAC™ Stationary Phase is the original, genuine Whatman / GE Healthcare product that has been a premium value used by HPLC laboratories for many years.

This "Type-A" Stationary Phase is irregular shaped, has a large surface area with high loading capacity and is not end capped and is modified with a ligand that contains both Amino and Cyano functional groups. This Column is written in many Methods that call for a Partisil Amino-Cyano (PAC) Column.

This column is supplied with the Whatman Compression Sealing System RAC-II (WCS).
