

Catalog Number

68040-05P

HPLC Column, NP Amino, 10um, 4.6mm ID x 50mm Length, 100A.
Cogent Brand. 1 EA.

Additional Info

This Cogent NP Amino™ Stationary Phase has been a premium value and used by HPLC laboratories for many years. Not end capped, it is manufactured using a 3 carbon Ligand (propyl) with a terminal amino group bonded to world class silica. This column is ideal as an Alternate in any USP Method that uses the L8 Classification or for new methods.

With a 10µm Particle, this Column works well with higher flow rates producing low back pressures compared with smaller particles. Used for polar molecules with a negative charge such as Sugars and compounds with Carboxylic Acid Groups in Normal Phase or *HILIC* modes these columns are packed and shipped in Normal Phase Solvents.

This Column is often used for scouting in Preparative Chromatography.
