

Catalog Number

82561-P21-250

Prep HPLC Column, NP Silica, 5 μ m, 100A. 21.2mm ID x 250mm Length. Cogent Brand. 1 EA.

Additional Info

This Cogent NP Silica™ Stationary Phase has been a premium value and used by HPLC laboratories for many years. This low metal content, 100A, very high purity Silica is not modified in any way and is ideal for purification of lipids or other polar compounds.

The 5 μ m Particle works well with prep flow rates and produces lower back pressures than smaller particles. The large diameter and length of this column provides high loading capacity which is great for purification of hydrophilic or polar compounds making this ideal for Preparative HPLC.

Additional Info

A specialized HPLC System is required for this column which is most often used in HILIC or Normal Phase mode.

Notes - A specialized HPLC System is required for columns this size. This is a CUSTOM ORDER manufactured item which cannot be returned or canceled once an order has been placed. Click [HERE](#) for more information on what is a Custom Order.
